

TRAILER ROLL STABILITY SUPPORT

RSS 2M

WABCO's four-sensor, two-modulator Roll Stability Support (RSS) 2M Trailer Safety System combines the benefits of antilock brake performance and trailer stability control in a single unit. Systems are available for OEM and retrofit installations.

RSS 2M is an advanced roll mitigation system that provides independent side-by-side control for optimum rollover protection. The system automatically accounts for the load status and calculates lateral acceleration while driving. In the event a potential rollover is detected, full brakes are applied, thereby reducing the likelihood of a rollover.

According to NHTSA rollover studies conducted with the WABCO RSS, the presence of a WABCO Trailer RSS results in improved stability when no tractor stability control system is present. The RSS system is also effective when the companion tractor is equipped with a stability control system.¹

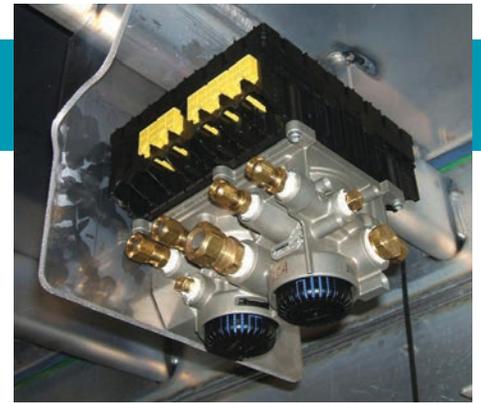

WABCO

TRAILER ROLL STABILITY SUPPORT RSS 2M

ROLL STABILITY FUNCTIONALITY

- Continuously monitors load status and lateral acceleration for optimized performance
- Brake pressure applied as needed to maintain stability control and mitigate potential for rollovers
- Targeted toward:
 - Tankers
 - Hazardous materials
 - Tri-axle trailers
 - Carriers that want maximum stability control and tire protection
- Features and benefits include:
 - Antilock brake performance
 - Integrated control and supply port screens for consistent optimal performance
 - Generic input/output (I/O) capabilities
- Optional lift axle control
- Optional tag axle control
- Telematic broadcasting capabilities

The NHTSA cost estimate for a rollover is \$1.4 million in the event of a fatality, \$462,000 in the event of an injury, and \$197,000 if there is property damage only.²

HIGHLIGHTS

- Features four-sensor, two-modulator system
- Mitigates or reduces likelihood of rollovers
- Available for retrofit and new trailer applications
- Provides support for both spring and air suspension
- Has antilock brake functionality

WABCO (NYSE:WBC) is a leading global supplier of technologies and services that improve the safety, efficiency and connectivity of commercial vehicles. Founded nearly 150 years ago as the “Westinghouse Air Brake Company,” WABCO continues to pioneer breakthrough innovations for advanced driver assistance, braking, stability control, suspension, transmission automation and aerodynamics. WABCO reported sales of \$3.3 billion in 2017 and has 15,000 employees in 40 countries. For more information, visit:
